

VISHWA V

PYTHON DEVELOPER & AI APPLICATION ENGINEER

Location: Namakkal, India **Phone:** +91 7339236313 **Email:** vishwamkce2023@gmail.com
LinkedIn: linkedin.com/in/vishwa20102005 **GitHub:** github.com/vishwa20102005

PROFESSIONAL SUMMARY

Innovative Electronics and Communication Engineering student specializing in **Python Development** and **AI Application Engineering**. Proven hands-on experience in architecting intelligent systems using Large Language Models (LLMs), Natural Language Processing (NLP), and cloud-based REST APIs. Microsoft Certified Azure AI Engineer Associate skilled in writing clean, efficient Python code, integrating vector capabilities, and building robust backend automation workflows.

TECHNICAL SKILLS

Languages: Python, Java, MySQL, JavaScript, HTML5, CSS3
AI & Data Science: Generative AI, LLMs, NLP, Prompt Engineering, Azure AI Services, Machine Learning
Backend & Frameworks: REST APIs, Bootstrap.
Tools & Cloud: GitHub, VS Code, Postman, Microsoft Azure, Altium Designer
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP).

TECHNICAL PROJECTS

AI Code Explainer & Analysis Tool

Independent Project

Tech Stack: Python, LLM APIs, Prompt Engineering, REST Endpoints, HTML/CSS

- Engineered an interactive web tool utilizing Python and Large Language Models (LLMs) to automatically parse code syntax and generate human-readable technical explanations.
- Implemented custom snippet-parsing workflows to deconstruct multi-language source code (Python, Java), reducing manual code debugging time by 35%.
- Designed secure backend API calls to process context-aware code analyses in real time with optimized token handling.

AI Email Auto-Responder & Categorizer

Independent Project

Tech Stack: Python, NLP, MySQL, Cloud APIs, Automation Workflows

- Developed an intelligent email processing engine leveraging Natural Language Processing (NLP) to parse, classify, and generate contextually accurate auto-replies.
- Integrated RESTful API endpoints with cloud serverless functions to automate user communication streams and accelerate query resolution workflows.
- Constructed database integration using MySQL to securely index message urgency, sentiment scores, and historical interaction logs.

Survivor Detection Enabled IoT Communication Pods

Team Project

Tech Stack: Embedded C/C++, Wireless Sensor Networks, Hardware-Software Integration

- Architected a resilient network pod mapping system optimized to trace isolated entities within signal-compromised disaster zones.
- Configured localized transceivers and wireless sensor telemetry to maintain emergency data routing during core infrastructure failures.

INTERNSHIP EXPERIENCE

Python with ML Intern

Nitroware Private Limited

- Applied Python frameworks and Machine Learning modeling concepts to complete dataset processing and transformation tasks.
- Collaborated with engineering teams to write, train, and troubleshoot predictive Python scripts aligned with automated testing metrics.

CERTIFICATIONS & ACHIEVEMENTS

- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** — Expertise in designing and implementing AI solutions on Azure.
- **Microsoft Certified: Azure AI Fundamentals (AI-900)** — Foundational knowledge of ML and AI workloads.
- **TCS CodeVita Certification** — Recognized for algorithmic coding performance in competitive corporate challenges.

EDUCATION

Bachelor of Engineering in Electronics and Communication	2023 – 2027
<i>M Kumarasamy College of Engineering, Karur CGPA: 6.7 / 10.0</i>	
Higher Secondary Certification (HSC)	2022 – 2023
<i>Sri Vinayaga Matric Hr Sec School, Namakkal Aggregate: 72%</i>
